serve yourself.

191 Magica  
191 Magica

# 191 Magica does it all by itself!

With these Carpigiani floor models, soft ice cream becomes self-service. The fully autonomous, token-operated Magica machines make use of the best Carpigiani technology, ensuring:

- a highly smooth ice-cream consistency, through the mix feeder pump
- the yield of any type of ice cream, with the exclusive self-scraping beater
- a healthy ice cream, due to the automatic pasteurization system
- utmost hygiene, as ice cream is dispensed in a protected area

The Magica machines bring ice cream closer to the customer, who can now try his/her favourite soft ice cream without needing anyone's help. Magica makes ice-cream dispensing extremely simple; all the customer needs to do is:

- buy a token from the cashier, who will distribute a cone
- follow the instructions on the 7" video located on the machine front
- insert the token and position the cone inside the holder
- press the button corresponding to the desired ice cream
- ...and the ice cream is ready in just a few seconds

Machines are provided with 250 tokens and an inner tray capable of holding 1,000 tokens.

Two versions of these self-service machines are available:

- 1 191 P/SP Magica - yields a one-flavour ice cream
- 2 191 P/SP Magica Colore - yields a one-flavour ice cream and two variegated flavours.

## Technical data
